## Problems for Recitation 12

 $\Omega$  o  $\omega$ 

## 1 Asymptotic Notation

Which of these symbols

can go in these boxes? (List all	that apply.)	
$2n + \log n$	=	(n)
$\log n$	=	$\boxed{ \qquad } (n)$
$\sqrt{n}$	=	
$n2^n$	=	$\boxed{ \qquad } (n)$
$n^7$	=	$\boxed{ (1.01^n)}$

O

Recitation 12

## 2 Asymptotic Equivalence

Suppose  $f, g: \mathbb{Z}^+ \to \mathbb{Z}^+$  and  $f \sim g$ .

- 1. Prove that  $2f \sim 2g$ .
- 2. Prove that  $f^2 \sim g^2$ .
- 3. Give examples of f and g such that  $2^f \not\sim 2^g$ .
- 4. Show that  $\sim$  is an equivalence relation
- 5. Show that  $\Theta$  is an equivalence relation

## 3 More Asymptotic Notation

1. Show that

$$(an)^{b/n} \sim 1.$$

where a, b are positive constants and  $\sim$  denotes asymptotic equality. Hint  $an = a2^{\log_2 n}$ .

2. You may assume that if  $f(n) \ge 1$  and  $g(n) \ge 1$  for all n, then  $f \sim g \Rightarrow f^{\frac{1}{n}} \sim g^{\frac{1}{n}}$ . Show that

$$\sqrt[n]{n!} = \Theta(n).$$
